

**See bolder, brighter, better colors with ChromaBoost™**

- A breakthrough in color-enhancing technology with significant vision performance advantages.
- Designed using patented, generative AI technology.
- Available in a variety of EyeFOCAL lens options.

DOCTORS  
OPTICAL LABS

SEE THE WORLD IN VIBRANT COLOR

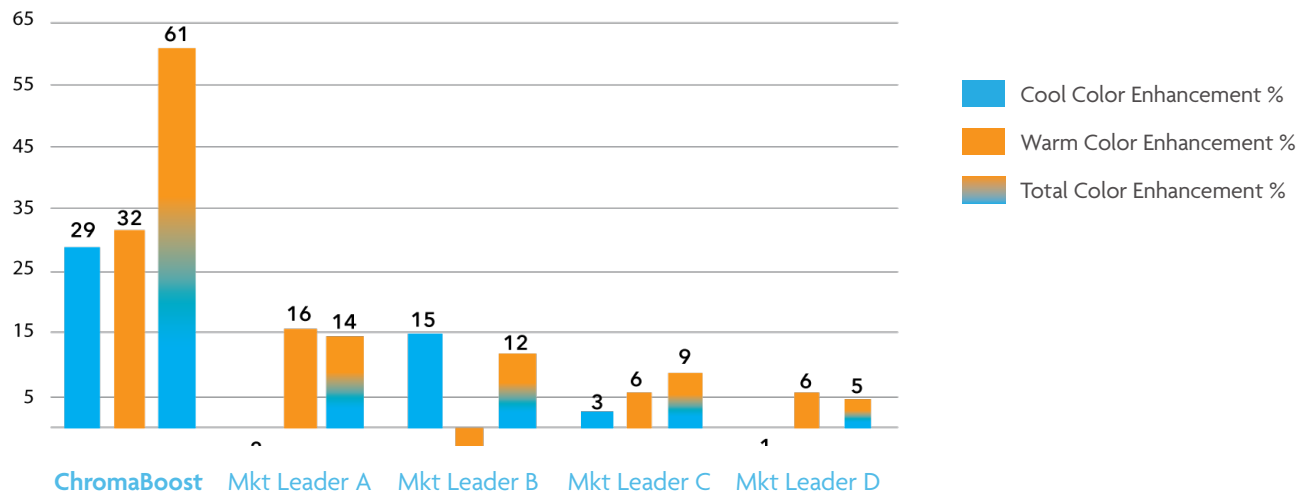

The human eye can perceive over one million colors, yet traditional lenses limit this visual potential. ChromaBoost™ lenses optimize color resolution, enabling patients to see hues more vividly for elite performance and profound enjoyment.

ChromaBoost lenses are designed using patented, generative AI and new optical science to dramatically enhance color vision and provide significant vision performance advantages. Patients will be able to see bolder, brighter, better colors with ChromaBoost lenses.

Sunglass Market Leader      ChromaBoost Technology

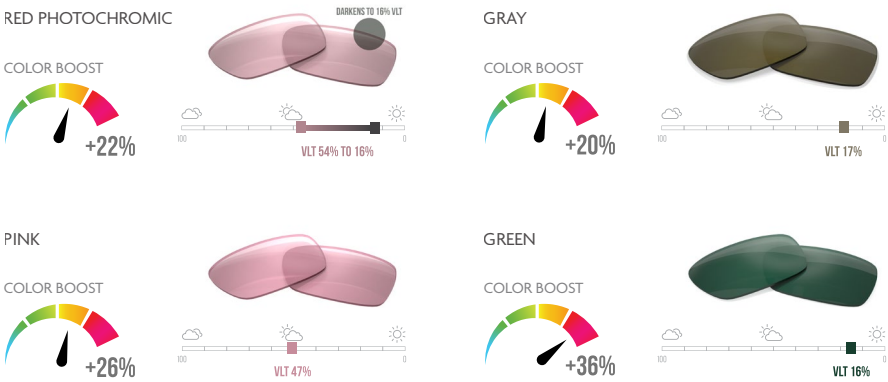

The ChromaBoost technology provides premium performance in total color enhancement and balanced enhancement for all warm and cool colors.

## A MORE EFFICIENT COLOR-ENHANCING SYSTEM

Many sunglasses available in the marketplace filter light and glare, but at the expense of colors. The more you filter light, such as glare from sand, water, and snow, the darker the lens becomes and the more colors are diminished and desaturated.

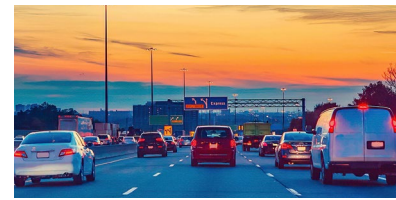

ChromaBoost lenses magnify colors for visual awareness, target recognition, target tracking, and reaction time. They expand patients' ability to detect safety markers and hazards.

### Saturation

Colors appear more saturated and vibrant.

### Safety

Increases visibility of traffic signals, brake lights, pedestrians and road conditions.

### Contrast

Color contrast and color resolution are increased.

### Clarity

Sharper, more vivid vision with our advanced 99% efficient polarized technology.

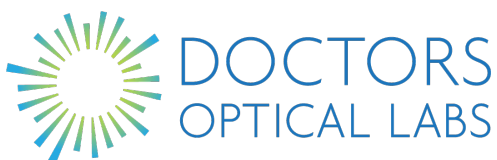

### Performance

Enhances depth perception, tracking, hand-eye coordination and reaction time.

ChromaBoost is available in polycarbonate in the following lens designs:

- EyeFOCAL OMNI NAL®, FX, Select+ and Basic
- EyeFOCAL SV and Anti-Fatigue
- EyeFOCAL Bifocal Round 32 and 40

NAL is a USPTO registered trademark by Quest Vision Care Specialty Lab
